ITL Achieves Environmental Milestone

2 August, 2005

ITL is proud to announce that our Malaysian manufacturing facility has gained certification to the Environmental Management System ISO 14001:2004 and has also successfully upgraded our Quality Management System to ISO 13485:2003.

CEO William Mobbs says, "Increasingly, our customers are looking for products that meet the highest quality and environmental standards. We see these two new standards as good for the environment but also good for business."

ITL is an environmentally aware organisation and has a proven track record in continually upgrading our Quality Certification. With the opening of our manufacturing facility in Malaysia in 2000, we achieved certification to ISO 9002/13488 and EN 46002. This was then upgraded to ISO 9001/13485 and EN 46001, including compliance to European Council Directive 93/42/EEC (CE mark) in 2002.

We are pleased that our key customers have endorsed ITL's certification in Environmental Management (ISO 14001:2004).

Bill Mobbs
CEO
ITL Limited

ITL (ASX: ITD, www.itl-limited.com) designs and manufactures innovative medical devices and procedure packs for global healthcare markets. ITL is committed to bringing products to the market that consistently prove to be market leaders in safety and innovation and supplies 200 private and public hospitals across Australia with its range of customised Procedure Packs. ITL's products have a presence in over 35 countries and protect the lives and health of healthcare workers in millions of procedures.
